PROFILE

Software engineer with a B.S. in Information Systems. Highly skilled in communication and teamwork throughout the last 5 years of a career in B2B sales and logistics. Comfortable with speaking to non-technical audiences about technical subject matter. Proven track record of achieving quarterly goals through team leadership. Now looking to pivot into software and web development to pursue a harbored passion for tech. Excited to grow in this industry and join in the creation of innovative products through problem solving in teams.
